

Dear Parent/Carer,

18th September 2026

Accessing Sparx Maths and Sparx Reader at Home:

We use Sparx to support students' learning and homework. To complete their work, students will need to log in to their Sparx account using their username and password. Sparx uses the same login details across all Sparx Learning products.

How students log in:

1. Visit the Sparx login page.
2. Select our school from the school search.
3. Enter their **username** (first name and second name with no spaces in lower case) and **password** (students chose these in lessons and wrote them in their maths book).
4. Click **Log In**.

Please remind your child to check that they have selected the correct school before signing in, particularly if multiple children use the same device.

If your child forgets their password:

Students can request a password reset from the login page by selecting "**Forgotten login details?**" and following the instructions. A member of staff will then need to approve the password reset request before a new password can be created. Please note that staff will respond to these requests in line with our communication policy.

Alternatively, your child can speak to their maths or English teacher and we will be happy to help arrange a password reset.

Common login issues:

- Ensure your child has selected the correct school.
- Check that their username has been entered exactly.
- If several incorrect login attempts have been made, the account may be temporarily locked. In this case, waiting a few minutes or requesting a password reset should resolve the issue.

If your child continues to experience difficulties accessing Sparx, please contact the school and we will be happy to assist.

Thank you for your support in helping your child complete their homework.

Yours faithfully,

Stuart Allen

Assistant Associate Headteacher
